

Brazil

When we met and interviewed this young lady at a spiritual healing centre for HIV sufferers near Addis Ababa, she was in a very distressed condition.

The profile showing her distended abdomen emanated from an HIV tumour.

Our law firm undertook to pay AU\$350 to place her in the care of the HFC hospice, for antiviral treatment and nutritional support. The below photo shows her with the remarkable Yewoinshet who set up HFC and the equally remarkable Ababa, one of the HFC hospice nurses. The tumour has all but disappeared and Brazil has experienced extraordinary recovery after entering the care and custodianship of HFC.

What I find remarkable is that for a cost of a pair of designer sunglasses one can both save and turn a person's life around and the dividend for humanity is colossal.
